2020 HUNT REPORT

www.huntswow.com

As I sit here trying to create our 2020 Hunt report I'm reminded how tough of a year it was. Everyone has had to deal with the effects of Covid. Its been hard on everyone, both financially and mentally. It definitely wasn't what I was hoping for or expecting when I was sitting down writing our 2019 Hunt Report at this time last year. Regardless I think its important to be optimistic and focus on the positives. One of the big positives is the extra time we got to spend together with our kids as a family. Lets hope 2021 improves and everyone can start to get back to a more normal life.

We were unable to get to camp for spring bear, so we enjoyed spring in the Yukon doing some family camping along with a few fishing trips. In September we got out bird hunting and even managed a few wolves one day. Normally I'm busy in August guiding sheep hunts but this season I was able to get out to the mountains and help a good friend get his first dall Sheep. I also took some time to recharge the batteries with a solo sheep hunt for myself. Some of the Yukon Outfitters were able to take some Canadian Clients so I ended up guiding a few hunts for Dall Sheep and Moose. The hunts were alot of fun and everyone was successful. It was a really cool experience for me as I was hunting in new areas that I hadn't guided in before. I worked for North Curl Outfitters and Cosco Outfitting both of which do a great job and have fantastic hunting.

YUKON MOOSE HUNTS

I'm excited to announce a new opportunity to be able to offer Yukon Moose Hunts through Cosco Outfitting. While these are some of the biggest moose on the planet its much more than a simple hunting trip. Its a total experience with a remote and untouched wilderness that you have to fly into. Truly its the adventure of a lifetime. These will mostly be river based hunts where we travel the river by either floating down in an inflatable raft or using a jet boat. We will camp right along the banks of the river enjoying everything the Yukon has to offer. I had the privilege to hunt some of the area this fall and was pleasantly surprised at the numbers and quality of moose. Hunters can expect to see numerous moose each day. By hunting the rut and utilizing calling the encounters are usually up close and personal and very exciting.

Moose are typically in the 55'-60' range but do reach 65"+

There's always the chance to come across Grizzly bears, Caribou, Wolves or Wolverine and are available as extra animals. Hunting space is limited and spots fill up quickly so if your interested don't wait to get intouch.

SASKATCHEWAN WHITETAIL HUNTS

**100% OPPORTUNITY
100% SUCCESS RATE**

This deer season was pretty low key. We only had a handful of Canadian clients but everyone got a deer which was nice. We had some close encounters with a few nice bucks that we never managed to get. The deer herd seems to be doing better each year and were seeing a high number of up and comers. We have a huge territory (125 000 acres), which to date only has been very lightly hunted. There are many deer that have never seen people which gives them the chance to mature and reach their full potential. As our area is so large, one of my main goals is to expand our network of trails and hunt in areas that previously haven't been hunted. I'm excited for next season as we'll be hunting a bunch of previously unhunted areas that are remote. We'll be utilizing a spike camp along with our main camp. This will allow us to hunt some great new areas along one of the rivers. We also got into another remote area later in the season with an argo once things started to freeze up. We are really looking forward to seeing what these areas produce.

SASKATCHEWAN

BEAR HUNTS

Let hope things improve throughout the new year so we're able to host our clients this spring for our Black Bear Hunts and Fishing trips. There's lots of bear hunts on the market and it can be hard to stand out from the next guy.

Here's a few of the reasons to consider hunting with us. Simply put the bear hunting in our area is exceptional. Typically 15-20% of our bears are colour phase. We also only target bears over 6'. We pride ourselves on harvesting big mature boars by offering a limited number of hunts. This results in plenty of action in the stand with multiple bears at each bait. During the day we hit the river and offer up some excellent walleye fishing. We can also explore on ATVs or simply relax before heading out for the evening hunt. It's a laid back atmosphere, with lots of socializing and great camaraderie in camp. With that said all this is only possible because of the great crew I'm lucky to have.

This year my Mom was cooking along with babysitting my high energy 4 year old son Colton, who came up for 6 weeks. My Dad and Wes Knott were guiding and both went the extra mile for their hunters. Darin Robb worked his butt off fixing the road and jumped in to help whenever we needed it. Unfortunately my wife Jessica had to stay in Whitehorse running her own business while trying to keep track of our 2 year old daughter Hailey. Hopefully we'll have the whole family up for 2021. Thanks for your interest and support and don't be shy to drop us a line if you would like more information on any of our hunts.

Sincerely Adam Stillar

2020 COVID SURVIVERS

Here's a few of our up and coming deer we'll be after in 2021
